🔗 Portfolio: asadali.site 🌐 Tryhackme : pylus 🔄 AsadAli0456 📄 https://medium.com/@aa7661538

Profile

Computer Science graduate with hands-on experience in threat detection, vulnerability assessment, and red team simulations. ISC2 CC certified, ranked top 7% on TryHackMe, and experienced with tools like Nmap, Burp Suite, Wireshark, and MITRE ATT&CK. Actively contributing to cyber defense strategy via case studies, CTFs, and technical blogging.

Professional Experience

Cybersecurity Writer

Published in-depth walkthroughs and case studies on Medium including "Tracking APT28 & APT33 Case Study using MITRE ATT&CK". Focused on threat intelligence mapping, cyber defense strategy, and red team simulations & CTFs.

Red Team Intern

Conducted SQL injection, XSS, and directory enumeration using Burp Suite and Gobuster. Used Nmap and Wireshark to map networks and capture traffic. Document steps and findings in structured pentest reports.

Education

BS Computer Science
UET Lahore

2021 Oct – 2025 May

Skills

Cybersecurity Fundamentals

CIA Triad | Security Controls | Basic Risk Management | GRC Concepts

Networking & Security Tools

OSI & TCP/IP Model | IP Addressing & Subnetting

VAPT & Red Team Tools

KaliLinux | BurpSuite | Nmap | Metasploit | Gobuster | SQLmap | Wireshark | CTFs

OS & Programming Languages

Windows(AD) & Linux (Kali, Ubuntu, ParrotOS) & MacOS | JavaScript (React.js) & Python & C++

Methodologies & Frameworks

OWASP Top 10 | MITRE ATT&CK | Pyramid of Pain | Cyber Defense Frame | Log Analysis

Soft Skills

Strong Communication | Problem-Solving | Critical Thinking | Team Collaboration

Certificates

- ISC2 [CC] Certified in Cybersecurity
- Cybersecurity Fundamental (Fortinet)
- CISCO Cybersecurity & Networking Basic
- OWASP Top 10 (Infosec)

Projects

TryHackMe Labs & Simulations

Completed 70+ rooms and solved many CTPs. Ranked top 7% globally. Performed web app enumeration, login brute forcing, and log analysis simulations.

E-HospitCare System (FYP)

My role is to build responsive interfaces with React, while enforcing security best practices like input sanitization and role-based access controls.

Basic Port Scanner

Built a Python-based TCP Port Scanner capable of scanning 1,000+ ports/minute, implementing socket timeout logic and command-line input sanitization.
